Passerelle Coach

Release Notes v3.3

General

Main New Features

- o The main and biggest improvement is the addition of the iOS App

Admin Web Application

New Features

- o Make it possible to import users by means of a file import
- o Create new user role: Customer.
    - o No access to Admin
    - o No access to Contacts
    - o If an optional 'Preferred Support Group' is specified, a user with this role will only be able to Call this Support Group
    - o If no optional 'Preferred Support Group' is specified, a user with this role will only be able to accept incoming calls
- o Add possiblity to manage oAuth2 protected Integrations
- o Added support for generating QR codes without source user (allowing any user to scan this code and start a call to the configured target user or group)

Enhancements

- o In users table also show invited users and mark them orange (and inactive red)

Bug Fixes

- o Fixed some minor layout and theming issues

Mobile Web Application

New Features

- o Adapt interface in case of user role : Customer
- o Added possibility to select audio input and output (desktop app only)

Enhancements

- o Added support for starting a call by scanning a generated QR code without source user
- o Improved image quality when annotating / screen sharing

Bug fixes

- o Caller sometimes sees 'Contact not reachable', when the contact should be reachable
- o Fixed issues with communication failure message after refresh

Known issues

- o There's currently a known issue on iOS browsers and MAC Safari browser that causes images to be distorted or rendered completely in black.

Mobile Android Application

New Features

- Adapt interface in case of user role : Customer

Enhancements

- Added support for starting a call by scanning a generated QR code without source user
- Added support for recording started/stopped events
- Improved error handling for failed connection

Bug fixes

- Fixed crash when camera/mic permissions have been denied
- Fixed crash when handling voice commands before UI is ready

Technical

Added support for connecting with new iOS Coach app
